

Our AI Transformation Philosophy

μPledge

Phase 1 Awakening

Recognise the need to change. Build awareness, assess honestly, and experiment safely.

Phase 2 Embodiment

Turn insight into infrastructure. Prioritise, build, and implement.

Phase 3 Transcendence

Scale, mature, and lead. Become the organisation others follow.

What We Do

5 Automata Personas

in Finance

μPledge

These determine the learning pathways and career trajectories in this new 'age' of an AI-driven world

What is your
Automata Persona?

What is Your Role?

Managing personal & organizational expectations

The Landscape

The AI Revolution: Rules-Based vs. ML

- Traditional Rules-Based Systems: Fragile and deterministic
 - Machine Learning (ML): Flexible, adaptive, and scalable
- Removing the barrier of specialized manual reprogramming
- Handling ambiguity and complexity in modern financial data

AI Evolution

Understanding Two Key Types

Predictive Intelligence

Predictive AI, often called The Analyst, utilizes historical data to forecast future outcomes, significantly aiding in areas like credit scoring and fraud detection for informed decision-making.

Generative Intelligence

Generative AI, referred to as The Creator, produces new insights and content from existing information, such as summarizing earnings calls or drafting financial reports for enhanced efficiency.

The history of AI

1940s-1950s

Foundations of AI

In the 1940s, the first artificial neurons were conceptualised. The 1950s introduced us to the Turing Test and the term "Artificial Intelligence".

1960s-1970s

Early Development

The 60s and 70s brought the birth of ELIZA, simulating human conversation, and Dendral, the first expert system, showcasing the early potentials of AI.

1980s

AI Winter & Expert Systems

The 80s faced reduced AI funding but saw the inaugural National Conference on AI. The backpropagation concept rejuvenated neural networks.

1990s

Revival & Emergence of ML

The 90s witnessed IBM's Deep Blue defeating chess champion Garry Kasparov and the inception of the LOOM project, laying the foundations for GenAI.

2000s

The Genesis of Generative AI

Geoffrey Hinton propelled deep learning into the limelight, steering AI toward relentless growth and

"Human-like"

Generating human-like
financial synthesis and
commentary

Cautionary note: Hallucinations & Factuality

Numerical fluency is a MASSIVE gap.

- AI Hallucinations: Persuasive but fundamentally incorrect data
- The LLM gap: Predicting next words vs. verifying truth
- Danger: Fabricating revenues, ratios, or regulatory citations
- The solution: Strict Retrieval-Augmented Generation (RAG)

\$12.5 Trillion in assets processed

Real-World Impact: BlackRock Aladdin

- Platform: Asset, Liability, Debt and Derivative Investment Network
- Function: Comprehensive **risk modeling** and portfolio management
- Data: Processing **vast volumes of historical and real-time market data**
- Utility: Stress-testing portfolios against complex economic scenarios

500 million transactions enriched daily

Real-World Impact: Plaid & Data Connectivity

- Disrupting traditional financial workflows with agile **data connectivity**
- Categorizing messy transaction data into **clean, standardized formats**
- Abstracting the complexity of legacy bank integrations
- Enabling transparent, real-time personal finance applications

Tooling Preview

NotebookLM for Reporting

Key differences in NotebookLM:

- Source-grounding is automatic - you don't paste data, you upload it
- Citations are built-in - it references source documents natively
- No multi-turn chains - NotebookLM works best with single, well-crafted prompts
- Tone/style adaptation - NotebookLM excels at this, more than calculation
- Hallucination resistance - NotebookLM is better at saying "not in sources"

sottening in Q1 due to enterprise deals being pulled forward into Q4 2024.

Likelihood: High | Impact: Medium

2. Personnel Costs: Over-hiring risk if Q1 revenue softens, as headcount was front-loaded to meet demand.

Likelihood: Medium | Impact: High 4

Strategic Priority for Q2

• Launch API platform ecosystem.

• Onboard 20+ integration partners.
• Reduce implementation time significantly.

Initiative: Launch an API marketplace with 20+ integration partners.

Get started with Microsoft 365 Copilot Notebooks

Last updated: April 2026

Where to find Copilot Notebooks

A Microsoft 365 Copilot or Copilot Chat license is required to use Copilot Notebooks

1. Sign in to microsoft365.com.
2. In the top-left corner, select the app launcher (waffle menu), then select **Notebooks**.
3. The Notebooks dashboard opens.

Contoso Design Research

Gemini & Google Sheets

UNIQUE CAPABILITIES:

- ✓ Generate working Google Sheets formulas (not just explain them)
- ✓ Create actual charts in your spreadsheet
- ✓ Apply conditional formatting rules
- ✓ Clean and transform data in-place
- ✓ Reference named ranges and multiple sheets
- ✓ Insert pivot tables
- ✓ Works within cell limits (no context window issues)

DealDesk

UNIQUE CAPABILITIES:

- ✓ Step-by-step Chain Reasoning
- ✓ Additional verification, audit, and reconciliation
- ✓ Customizable repeatable workflows
- ✓ Ephemeral retention
- ✓ Metadata-only logs
- ✓ Heightened Data security - TLS, HTTPS, server-to-server.
- ✓ Retrieval Augmented Generation (RAGs)
- ✓ Auto-audit, verification and reconciliation

Wrap-up

My journey, Your journey

2018

 Found by EY Global
— beat candidates from
SG, China, Japan

2016

Started in Malaysia
— championed AI
initiatives &
upskilling

2019-2026

-  Went on to build / launch AI for 45+ countries
-  Advised on AI regulatory policy globally
-  Started / scaled 2 businesses

2018

 Faced massive resistance. Almost left.
