steps**

Why AI matters to HR and management now

HR uses AI for its own work

Documentation, announcements, meeting notes and training planning.

HR sees the whole organisation

Every department can save time when AI is introduced properly.

HR can impress management

Bringing useful AI training positions HR as strategic and proactive.

This is not only HR training. It is a doorway to company-wide productivity.

History of AI

1950

The time
when it all
started.

1955

John McCarthy
coined term
'Artificial
intelligence'.

1974

Computers
became faster
& affordable

1980

The year of
Artificial
Intelligence.

2000

Landmark of
AI
establishment
achieved.

The AI Universe

Industries which AI have touched

- Healthcare
- Retail
- Hotel
- Semiconductor
- Manufacturing
- Agriculture
- Education
- Military

3 Types of Artificial Intelligence(AI)

- Artificial Narrow Intelligence [Narrow AI]
- Artificial General Intelligence [General AI]
- Artificial Super Intelligence [Super AI]

What is GPT ??????

Generative Pre-trained Transformer

Traditional AI vs Generative AI Use Cases

TRADITIONAL AI	GENERATIVE AI
Predictive Analytics	Automated Content Creation
Fraud Detection	AI-Generated Art
Personalized Recommendations	Synthetic Data Generation
Business Process Automation	Automated Content Moderation

AI for Managers & Team Leaders

Meeting preparation

Agenda, talking points and expected questions.

Problem structuring

Options, risks, considerations and next steps.

8	5	3	3h 30m
Total Tasks	High Priority	Medium Priority	Total Duration

02 TASK REGISTER

The table below provides a full breakdown of all tasks for the day, including priority level, responsible team, and estimated duration.

Professional report

ChatGPT Individual Task

Ask ChatGPT to help you draft a review/testimonial message to post about today's AI Workshop on your FB and LinkedIn.

Selected questions from participant

How can HR ensure AI hiring tools remain fair and free from bias?

What is Responsible AI

is an ethical framework for designing, developing, and deploying AI systems that are safe, trustworthy, and beneficial to society.

The Biggest AI Concerns

- Bias
- Hallucination
- Ethics
- Security

Human Review Still Matters

AI can assist, but people remain responsible for the final output.

Data Privacy Considerations

Avoid uploading:

- confidential contracts
- sensitive personal data
- financial records

without approval.

The Human + AI Partnership

Human Expertise

Experience, judgment,
creativity, and empathy

+

AI Speed

Data processing, automation,
and instant insights

=

Best Results

Smarter decisions, higher quality,
greater impact

Where **human insight** meets **machine intelligence**
extraordinary outcomes happen.
