

Know What's Working Track
Output, Reduce Waste, and
Boost Efficiency Digitally

Course Outcomes

Understand the fundamental concepts of digital transformation in the context of manufacturing.

Identify key areas in their manufacturing operations where digital tracking can provide significant benefits.

Recognize practical digital tools and approaches for output tracking, waste reduction, and efficiency improvement, even with limited technical expertise.

Course Modules

- Module 1: Seeing the Bigger Picture: Why Go Digital?
- Module 2: Tracking Output the Easy Way
- Module 3: Cutting Down on Waste Digitally
- Module 4: Boosting Efficiency with Digital Insights
- Module 5: Your Digital Journey: Next Steps

Module 1: Seeing the Bigger Picture: Why Go Digital?

Welcome!
Let's Make
Things Easier

This isn't about becoming a tech expert overnight.

It's about finding smarter, simpler ways to run your manufacturing.

Think of it as upgrading from pen and paper to tools that give you superpowers!

The Challenges We All Face

Ever feel like you're guessing about what's really going on?

Are there piles of scrap or delays that just seem to happen?

Wish you had a clearer view of how your team and machines are performing?

These are common challenges in manufacturing, and digital tools can help!

Digital Transformation: It's Simpler Than You Think

Digital transformation isn't about robots taking over (not yet anyway!).

It's about using digital tools – like software and online systems – to improve how you work.

Think of it as upgrading your old phone to a smartphone – more features, more insights, easier to use.

For manufacturing, this means tracking production, managing inventory, and understanding your processes better, all digitally.

What's In It For You?

SEE EXACTLY HOW MUCH
YOU'RE PRODUCING – NO
MORE GUESSING!

IDENTIFY WHERE WASTE
IS HAPPENING AND CUT IT
DOWN.

MAKE YOUR OPERATIONS
SMOOTHER AND FASTER.

ULTIMATELY, SAVE TIME
AND MONEY!

Module 2: Tracking Output the Easy Way

From Paper to Pixels: Simple Digital Tracking

- You might already be tracking output on paper or in spreadsheets.
- Digital tools can make this faster, more accurate, and easier to analyze.
- Think simple apps on tablets or computers right on the production floor.
- These can track what's made, when, and by whom.

Simple Tools You Can Use

Digital Forms: Think of online versions of your current paper forms – easy to fill out on a computer or tablet.

Spreadsheet Software (like Excel, but online!): Collaborative spreadsheets that everyone can update in real-time.

Simple Production Tracking Apps: User-friendly software designed specifically for tracking manufacturing output.

Seeing the Benefits: Real-Time Insights

Know exactly how many units were produced today, this hour.

See which machines or teams are performing well.

Identify bottlenecks or slowdowns as they happen, not days later.

This allows you to react quickly and make improvements.

Getting Started: Baby Steps are Okay!

Start small – pick one key production line or process to track digitally.

Involve your team – get their input and make it easy for them.

Don't aim for perfection right away – focus on getting the data in.

You can analyze and improve later.

Module 3: Cutting Down on Waste Digitally

What is Waste in Manufacturing?

- Waste isn't just scrap material.
- It includes things like:
 - Overproduction (making more than needed)
 - Waiting time (idle machines or workers)
 - Defects (products that need rework or disposal)
 - Unnecessary movement (of people or materials)
- Digital tracking can help you see these hidden wastes.

Tracking Waste: Where is it Happening?

Digital records can track defects and their causes.

Timestamps in digital logs can reveal waiting times between processes.

Inventory management software can prevent overproduction.

Sensor data on machines can highlight inefficiencies.

Simple Digital Tools for Waste Reduction

Digital Quality Checklists: Track defects and identify patterns.

Digital Work Instructions: Ensure processes are followed consistently, reducing errors.

Basic Inventory Management Software: Keep track of stock levels and avoid overproduction.

The Payoff: Less Waste, More Profit

REDUCING WASTE
DIRECTLY LOWERS YOUR
COSTS.

FEWER DEFECTS MEAN
LESS REWORK AND FEWER
SCRAPPED PRODUCTS.

OPTIMIZED INVENTORY
REDUCES STORAGE COSTS.

ULTIMATELY, A LEANER
OPERATION IS A MORE
PROFITABLE OPERATION.

Module 4: Boosting Efficiency with Digital Insights

What Does Efficiency Look Like?

EFFICIENCY IS ABOUT DOING
MORE WITH THE SAME OR FEWER
RESOURCES.

THIS MEANS PRODUCING MORE
GOODS IN LESS TIME, WITH LESS
EFFORT AND LESS WASTE.

DIGITAL TOOLS PROVIDE THE
VISIBILITY NEEDED TO IDENTIFY
AREAS FOR IMPROVEMENT.

Identifying Bottlenecks and Optimizing Flow

Digital tracking can highlight where work is getting stuck.

Production dashboards can show the status of different stages in real-time.

This allows you to address bottlenecks and improve the flow of work.

Making Data-Driven Decisions

Instead of relying on gut feeling, you can make decisions based on real data.

See trends in production, waste, and efficiency over time.

Identify what's working well and replicate those successes.

This leads to more informed and effective improvements.

Simple Steps to Boost Efficiency Digitally

- Start by tracking key metrics that matter most to your business.
- Visualize your data using simple charts or graphs.
- Hold regular team meetings to review the data and identify improvement opportunities.
- Focus on continuous small improvements rather than big overhauls.

Module 5: Your Digital Journey: Next Steps

Recap: What We've Covered

- We explored why going digital is beneficial for SME manufacturers.
- We looked at simple ways to track output digitally.
- We discussed how digital tools can help reduce waste.
- We saw how digital insights can boost efficiency.
- Remember, it's about making things simpler and smarter!

Taking the First Step

- Identify one area in your business where digital tracking could make the biggest difference.
- Talk to your team and choose a simple digital tool to try.
- Don't be afraid to experiment and learn as you go.
- There are many resources available to help you.

You've Got This!

- Digital transformation is a journey, not a destination.
- Every small step forward makes a difference.
- You have the experience and the drive to make this work.
