

The background features a large, glowing 'AI' in a stylized, outlined font. The 'A' is composed of two bright blue lines, while the 'I' is a single vertical blue line. This central graphic is surrounded by a dense field of blue and purple light streaks and particles, creating a sense of motion and digital energy. The overall color palette is dominated by deep blues and purples, with bright highlights from the light effects.

What is Artificial Intelligence?

Artificial Intelligence (AI) is the simulation of human intelligence in machines programmed to think and learn like humans.

AI systems are capable of performing tasks such as :

- **Learning**
- **Reasoning**
- **Problem-Solving**
- **Language Understanding**

A close-up, low-angle shot of a server rack in a data center. The letters 'AI' are prominently displayed in large, glowing blue 3D characters on a server panel. A red laser line is visible on the left side of the frame, and the background is filled with the complex structure of server cables and components, illuminated with a cool blue light.

Types of AI

Narrow AI is designed to perform specific tasks, such as facial recognition or language translation. It excels in its designated area but cannot perform tasks outside its scope.

General AI, on the other hand, is designed to perform any intellectual task that a human can do, mimicking human-like flexibility and learning capabilities.

Narrow AI

AI specialized for specific tasks or domains.

General AI

AI capable of performing diverse, human-like tasks.

AI in Everyday Life

AI is seamlessly integrated into our daily lives, from voice assistants like Alexa and Siri to smart home devices. At work, AI automates repetitive tasks, improves customer service with chatbots, and enhances decision-making with data analytics.

Smart Homes

AI-powered devices like thermostats, lights, and security systems.

Workplace Automation

AI automating repetitive tasks and enhancing decision-making.

Personal Assistants

Voice-activated tools assisting with reminders, tasks, and information.

Productivity Tools

AI tools for managing schedules, emails, and communications.

The Heart of Artificial Intelligence

➤ Machine Learning

A subset of AI where algorithms learn from data to improve performance on specific tasks.

➤ Deep Learning

A specialized Machine Learning technique using multi-layered neural networks to process and model complex data patterns.

Defining Generative AI

To understand generative artificial intelligence (GenAI), we first need to understand how the technology builds from each of the AI subcategories listed below.

Expert System AI

Programmers teach AI exactly how to solve specific problems by providing precise instructions and steps.

Artificial Intelligence

The theory and methods to build machines that think and act like humans.

Machine Learning

The ability for computers to learn from experience or data without human programming.

Deep Learning

Mimics the human brain using artificial neural networks such as **transformers** to allow computers to perform complex tasks.

Generative AI

Generates new text, audio, images, video or code based on content it has been **pre-trained** on.

ChatGPT

Midjourney

Bard

Why Generative AI in Productivity?

Types of AI that can create new content, such as text, images, audio and video.

ChatGPT

Drafting content via text generation
Able to understand natural language

Midjourney

Text to image

ElevenLabs

AI voice generator

Google Veo 3

Text to video

7 Practical Areas of AI Shortcuts

in daily life

➤ **Writing & Communication**

➤ **Task & Time Management**

➤ **Information Handling**

➤ **Data & Reports**

➤ **Visual and Creative Tasks**

➤ **Personal Productivity**

➤ **Automation Tools**

**To communicate
effectively with
ChatGPT,**

**Prompt Engineering is
important!**

The 6-Step Prompt Checklist

- ☐ **[task]** Clearly define your end goal
- ☐ **[context]** Tailor your responses
- ☐ **[examples]** Mimic style, structure, tone
- ☐ **[persona]** Embody a specific expertise
- ☐ **[format]** Bullet points, markdown, table
- ☐ **[tone]** Add layer of emotional context

More important

Less important

The Perfect Prompt

You are an individual who has adopted a healthier lifestyle over the past year, resulting in better physical and mental well-being. Inspired by your journey, a few friends have asked for advice on starting their own health journeys.

Write a message to share in a group chat with interested friends.

The message should outline the steps you took, share some challenges and how you overcame them, and offer to support them as they embark on their own journeys.

Use motivational and empathetic language.

[task]

[context]

[examples]

[persona]

[format]

[tone]

[task]

SIMPLE TASK PROMPT

“Generate a three-month diet program”

COMPLEX TASK PROMPT

“Analyze the collected user feedback from my newsletter, **summarize** the top 3 takeaways with a focus on improvement, and **categorize** the rest based on importance”

- Always begin with an action verb like "generate," "write," or "analyze,"
- Be clear and concise to ensure the model understands your requirements.

[context]

1. What's the user's **background**?
2. What does **success** look like?
3. What **environment** are they in?

User background

Success looks like

"I'm a 250lbs male aiming to lose 20lbs of fat in three months.
I only have time to cook meals once a week for 2 hours on Sundays.
Provide a three-month diet program to assist me."

Environment

[examples]

Examples allow ChatGPT to mimic the style, structure, and tone of anything.

“You’re a hiring manager in a marketing team responsible for writing the job description for a marketing manager job opening.

Your team primarily focuses on increasing brand awareness for Netflix’s advertising platform to acquire new partners.

Draft the job description using the format of this existing job description below: [paste example].”

💡 Research shows that including examples can significantly enhance the output quality.

[persona]

Persona is about embodying a specific character or expertise in ChatGPT.

Example prompts:

For injury rehab: "You are a physical therapist specializing in athlete recovery. Generate me a 2-month program that helps me recover from my tennis elbow."

For job seekers: "You are a hiring manager at a Fortune 500 company. Ask me 20 questions to will help me prepare for my future job interviews."

Pro tip:

You can get ChatGPT to respond as specific famous individuals.
Prompt example: "Rewrite this blog post in the style of Eminem."

[format]

EXAMPLE: ANALYZING READER FEEDBACK

"I've collected reader feedback for my newsletter after dozens of responses for improvement.

Output in a table with headers: original feedback, priority, and level of difficulty.
Here's the feedback: [paste feedback here]"

In addition to **tables**, other common formats that ChatGPT can generate flawlessly are **bullet points**, **email format**, **code blocks**, **paragraphs**, and **markdown**.

[tone]

EXAMPLES OF TONE

1. "Use a **casual tone** of voice"
2. "Use a **formal tone** of voice"
3. "Give me a **witty output**"
4. "Show **enthusiasm**"
5. "Sound **pessimistic**"

Tone adds a layer of emotional context to the response. It ensures that the content meets your informational needs and resonates with the intended audience's emotions and expectations.

Writing and Communication

AI Tools :

Gemini

"Write a follow-up email to a client who hasn't replied in 3 days. Keep it polite and professional."

"Turn this bullet list into a formal email: [Insert bullets]"

"Rewrite this email to sound more confident and concise: [Insert email]"

"Summarize this long email into 3 key points: [Insert email]"

"Create a LinkedIn post based on this article: [Insert article text or link]"

Time & Task Management

AI Tools :

Gemini

"Summarize today's meeting notes into a task list."

"Generate a weekly to-do list based on these goals: [Insert goals]"

"Suggest an ideal schedule for someone who works 9–5 and needs 2 hours of deep focus daily."

"Create an action plan based on these meeting notes: [Insert notes]"

"Remind me to email the vendor when I arrive at the office."

Information Handling

AI Tools :

Gemini

"Summarize this PDF into key bullet points: [Insert or upload PDF text]"

"What are the main arguments in this article? [Insert article text or URL]"

"Compare these two articles and highlight key differences."

"Find the action items from this meeting transcript: [Insert text]"

"Summarize these 3 webpages into one paragraph each: [Insert URLs]"

Data & Reports

AI Tools :

Gemini

"Write a summary of this sales data in plain English: [Insert data table]"

"Generate an Excel formula that calculates month-over-month growth."

"Explain what insights I can draw from this dashboard screenshot."

"Convert this CSV data into a table of key highlights."

"Write an executive summary for this quarterly performance: [Insert metrics]"

Visual & Creative Tasks

AI Tools :

"Design a poster for a new product launch. Theme: modern and tech-savvy."

"

"Create a 5-slide presentation about improving workplace productivity."

"Edit this video transcript and remove filler words like 'um' and 'uh'."

"Generate a caption for this Instagram post: [Insert image or text]"

"Suggest 3 social media graphics for a mental health awareness campaign."

Personal Productivity

AI Tools :

NotebookLM

"Convert this voice memo into a to-do list. [Insert transcript]"

"Translate this email from English to Malay (formal tone)."

"Create a shopping list based on this meal plan: [Insert meal plan]"

"Summarize this book chapter into 5 key insights."

"Draft a polite text to decline an invitation without offending the sender."

Automation Tools

AI Tools :

zapier

"Create a Zapier workflow that saves Gmail attachments to Google Drive."

"Use AI to summarize every new Google Form response and email it to me."

"Generate a report every Friday from my Google Sheet and send it via email."

"Create a workflow in n8n that scrapes a webpage, summarizes it using AI, and stores the result in Notion."

"Using ChatGPT Code Interpreter, clean this data file and show top 3 trends."

Conclusion

Artificial Intelligence offers immense potential to transform industries, improve lives, and solve complex challenges. However, its future success depends on how we address its ethical, economic, and social implications. By embracing AI responsibly, we can ensure that it benefits all of humanity and drives positive change.

Fact Check

Always check the facts and inputs provided

01

Use as a draft

Make the input as your first draft, not take it directly as final draft
